

## CEIA Metal Detectors for School and Campus Protection

For 50 years, CEIA has set the standard for metal detection. Our systems move patrons through security checkpoints quickly, while providing one of the industry's highest and most accurate level of threat detection. Our industry leading walk-through and hand-held detectors are easy to use and provide outstanding reliability in school and campus protection.

- Capability to detect the full range of metal weapon threats anywhere on or in the body
- Low nuisance alarm rate, high throughput
- Quick, accurate analysis
- Exceptional immunity to environmental interferences

# SCHOOL AND CAMPUS PROTECTION

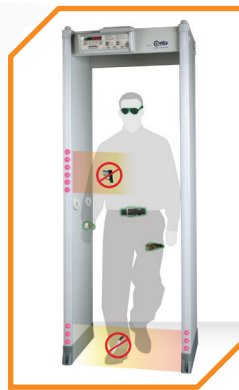

CEIA USA solutions include walk-through and hand-held metal detectors that comply with the strictest security standards and provide unmatched reliability, immunity to environmental interferences and consistency for the detection of all the metal objects that could be considered a threat to individuals and their safety. Our metal detector solutions include the following:

## CLASSIC

The CEIA Classic metal detector is a very lightweight, compact unit, featuring a stylish circular columns gate with integrated electronic control unit, ideal for portable and fast deployment applications.

- Lightweight (67 lbs.)
- Compact
- Quick Set Up (less than 10 minutes)
- Easy to Use

## HI-PE PLUS

The CEIA HI-PE Plus is the workhorse of the CEIA multi-zone walk-through metal detector product portfolio. The HI-PE Plus allows a high level of discrimination between significant metal masses, such as guns and personal metal effects. Exceptional immunity to environmental interferences makes it easy to use even when electrical noise is encountered.

- Multi-Zone Detection (60 zones)
- Extreme Flexibility
- Outstanding Immunity
- High Level of Discrimination Between Threat Objects vs. Personal Effects

## PD140E

The PD140E is a compact and lightweight metal detector featuring CEIA's full digital design for consistent performance, high reliability and calibration-free operations. The PD140E is easy to use and provides extended continuous operation time along with indoor and outdoor operations.

- Compact Device

## PD240-SET

The PD240 combines high reliability with advanced detection and operator signaling features. The PD240 offers full compliance with the latest NIJ security standards, indoor or outdoor use, and up to 100 hours of continuous operation on a single charge of its rechargeable batteries.

- Wide Search Area
- High Immunity to Floor Rebars Allows Lower-Body Screening without Sensitivity Reduction

## COMPREHENSIVE SUPPORT

CEIA USA is dedicated to providing our customers with superior service and support. We provide training on all of our units, and can even customize a session to meet your specific needs. In addition, our experts are available to offer you technical support by phone. If your CEIA unit needs service or repair, our technicians can handle your needs at our facility or yours.
