We Take Your Classroom and Make It a Gateway to the World.

performance

Excel.

Today's classroom is no longer static—it's responsive, dynamic and live
-streaming. Konica Minolta helps students learn through state-of-the-art interactive
classroom technology, IT services, multifunction products and 3D printers that
bring ideas to life in ways we never thought possible. Stimulating students and
giving them the power to learn, imagine, create, experiment, dream ... and excel.

It's just another way that Konica Minolta gives shape to your ideas—and taps the
full potential inside every classroom.

OaklandSchools
Cooperative Contracts Network

Konica Minolta Brings Collaborative Learning into the Classroom.

Konica Minolta leads the way in bringing innovative digital workflow solutions, products and services to educational entities, from K-12 Public to Private schools and Higher Education Institutions. Our offerings provide the technology to address the many needs facing the education community today. Whether it's finding ways to cut costs, enhance learning opportunities, improve document management, or support IT infrastructure and initiatives, Konica Minolta provides solutions that empower students and educators:

Electronic Content Management

Konica Minolta ECM solutions allow school districts to function as connected organizations integrating documents, practices and people in an efficient workflow that saves valuable time, money and resources.

Complete, Comprehensive Managed IT Services

Our certified engineers, cloud services, consultative services, project management planning and implementation can assist you with adopting new technologies to keep your school relevant in a changing world.

Application Workflow Solutions

Powerful software solutions for educational needs—seamlessly integrated with bizhub® control panels to increase productivity.

Production Print

Award-winning production print equipment includes high-speed production machines, wide format printers and offline finishing and label printers that meet the demand of production printing in house course content, marketing materials, reports and more.

Security to Protect Your Most Valuable Assets

Protecting sensitive student information is critically important. Konica Minolta MFPs include security features in compliance with FERPA (Family and Education Rights and Privacy Act) guidelines to identify users and restrict access with secure authentication in any form. Konica Minolta also offers an unsurpassed array of security features and functions, including password protections, support of standard HID proximity cards to control building and door access, magnetic stripe card systems to support standard back-end payment systems, biometric authentication capabilities and other advanced security enhancements.

And the Advanced Technical Support You Require

Konica Minolta provides educational applications with industry-leading service and support—including top-ranked performance in uptime, parts availability, engineering support, diagnostic repair, service expertise, hotline support and training materials.
