

in **PARTNERSHIP** with **Oakland Schools** to
deliver high-performance synthetic turf fields
vetted through a competitively bid process.

OUR LEGACY

Motz has been building fields and building futures for 40 years. We are passion and quality driven. We've made our name designing innovative and comprehensive performance-based sports field systems nationally and internationally. Athletes have competed on our surfaces in the NFL, MLB, NCAA, Olympics and even the World Cup. We are a global leader in sports field design and construction. Beginning with our world renowned, award-winning hybrid system, Eclipse, all the way through the full lifespan of hundreds of synthetic turf fields. Many of which are still on the ground and in play today, illustrating the quality of our products and the craftsmanship of the installation. As a proud partner of the Association of Educational Purchasing Agencies (AEPA), we understand our fields leave a significant impression for years to come. If selected, Motz will construct a solid platform that will further build your facility's sports legacy, along with our own. We take our commitment seriously and you can count on us to deliver a win.
