

Empower your students to be healthy and smart from the inside out with preferred pricing from **Oakland Schools Cooperative Contracts Network!** This research-backed, healthy living curriculum is linked to state-specific standards in math, science, language arts, and Health/PE, as well as national STEM standards for grades PK-5. The program is housed on an easy-to-use digital platform that is only **\$2.50/student** for the entire year!

To enhance the platform's content, the OrganWise Gal (or Guy), which contains beanies of the characters, has been a fan favorite for the last 30 years. This doll helps to bring health content to life and addresses tactile learners!

Complimentary virtual training can be scheduled during Pre-Planning on a first-come, first-served basis!
